

Cedar Impressions®

When to use double-course
or single-course siding

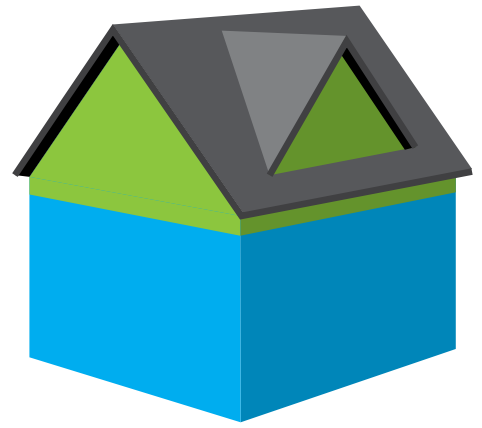

The right panel for the right job

Installation expertise is knowing what to install, and how to install it, all while maximizing your bottom line.

Cedar Impressions single-course and double-course siding products are durable and easy-to-install, allowing you to optimize crew efficiency to keep time—and money—on your side. Plus, they are engineered for interchangeable application, allowing you to offer the 'mix-and-match' exterior design options that homeowner's love.

Double course is best when siding large portions of a building. Using double course saves time and money when used on large expanses of a house.

Single course is optimal when siding gables and small accents. There is less waste using single course siding in gables. Use single course when finishing a run on a wall if there is 7" or less left to lay siding on.

■ Single-course siding

■ Double-course siding

Siding Scenario 1:

Install Cedar Impressions double-course perfection siding on the bulk of the house.

Install Cedar Impressions single-course perfection siding when coming up to the top of a wall or into a gable using the same color siding.

Siding Scenario 2:

Install Cedar Impressions double-course perfection siding on the bulk of the house.

Install Cedar Impressions single-course perfection siding when coming up to the top of a wall. Use an accent like Cedar Impressions Perfection Shapes panels in a gable using the same color siding.

Siding Scenario 3:

Install Cedar Impressions double-course perfection siding on the bulk of the house.

Install Cedar Impressions single-course perfection siding when coming up to the top of a wall. Use an accent like Cedar Impressions S7" or Perfection Shapes panels in a gable using a different color.

Cedar Impressions Single 7" panel

Single-course siding is optimal for accent areas and angular spaces

Due to its size, single-course siding product less waste than double-course siding in applications that require a lot of cuts—such as gables. It should also be used when finishing a run on a wall that is less than seven feet.

Cedar Impressions Perfection Shapes panels come in scallop, half-cove and octagon.

Double-course siding is best for large areas without architectural complexity

When it comes to covering large areas, double-course siding is the smart choice. Compared to single-course siding, it installs faster, with fewer fasteners.

Faster to Install

Installs with 50% fewer hammer swings and nails than single-course siding, while still providing optimal on-the-wall performance.

More Coverage per Panel

A double-course siding panel covers 4.55 square feet per panel, versus 3.5 square feet per panel for single course siding – an improvement of 30% in coverage area.

Cedar Impressions D7" panels have interlocking side tabs to ensure a consistent installation

CertainTeed products are designed to work together and complement each other in color and style to give any home a beautiful finished look.
