

Complete Grid Solutions

The complete line of CertainTeed Architectural grid products reflects our commitment to provide all the essential systems contractors need for commercial projects. We've gone above and beyond the basics with innovations that make the contractor's job easier. Our innovations are powered by expert knowledge, in-the-field experience and customer feedback. That real-world insight and installer focus helps us continually improve our grid line, putting money back in contractors' pockets with strong, stable, time-saving systems.

New, Improved

Focused on strength, efficiency and speed of installation

Input From Professional Installers

We involve contractors in our design and development process for real-world input that yields real-world advantages

Better Clips, Better Results

Redesigned systems feature stronger, faster-to-install and easy-to-release clips

Improved Grid System Training

On-staff experts with decades of installation experience add value to our full line of suspension systems

Complete Grid Solutions

A Complete Line of Essential Grid Products

Optimized for smart, efficient installation and superior results – informed by installer insight and customer feedback.

THE SYSTEMS	
Standard 15/16" and 9/16"	Traditional visual, proven strength, lasting durability, consistent quality.
All-Aluminum	Ideal for non-ferrous applications
Seismic	Quick and easy installation with recognized code compliance.
Fire Rated	Code compliance with simple installation. Suited for both UL and ULC fire-rated designs.
Drywall Suspension System	Double-stitched web for strength and stability, knurled face for easier screw installation, fast and painless installation.
QuickSpan™ Drywall System	Industry-leading strength, faster production, lower labor costs. Designed with installer input to be the quickest, easiest way to span hallway applications.
Bolt Slot and Tier Drop	Improved EZ Stab clip technology for consistent stability and installation ease.
